

MOHAMMED ALZAHMAH

Data Management & Governance | CDMP Associate | NDI & National Data Catalog

Riyadh, Saudi Arabia | +966 58 050 0220 | mahommedalsh@gmail.com | zahmee7.github.io/mohammed-card

PROFESSIONAL SUMMARY

CDMP-certified (Associate) data management professional helping establish and mature the Data Management Office (DMO) at the Shared Services Program. Works directly with the DMO manager across the 14 domains of the national data management framework and owns National Data Index (NDI) readiness, the National Data Catalog, open data, and executive DMO reporting. Brings a hands-on BI background in SQL, Power BI, and Excel.

WORK EXPERIENCE

Digital Transformation Consultant, Data Management Office

Feb 2026 - Present

Shared Services Program (SSP) | Riyadh, Saudi Arabia

- **National Data Index (NDI):** Lead SSP's NDI readiness and compliance work end to end: tracking maturity, running gap analysis on prior findings, preparing and reviewing evidence, and developing the policies, plans, and procedures behind it.
- **National Data Catalog:** Led SSP's onboarding to the National Data Catalog from the ground up. Documented technical and business metadata, the glossary, datasets, and KPIs, well beyond the required coverage.
- **Open data:** Took over SSP's datasets on the national Open Data Portal and set up a continuous intake process with departments, so new datasets keep reaching the publication plan.
- **Executive reporting:** Built the executive DMO dashboard from scratch as the single source for NDI progress and DMO initiatives, and produced a motion-graphics briefing on the DMO's progress for management.
- **Governance committee:** As secretary of the Data Governance and Management Committee, prepare agendas and minutes and follow up with department representatives until decisions are carried out, not just recorded.
- **Awareness:** Designed and delivered an SSP-wide workshop on data classification and an open data workshop for department managers, focused on what people need to do in practice.
- **Compliance & quality:** Reviewed personal data protection controls and policies against Saudi regulations, including data subject rights; set up data quality issue tracking with remediation plans and target dates; refined data sharing templates.

Business Intelligence Officer

Aug 2025 - Feb 2026

Takamol Holding (Qiya Platform) | Riyadh, Saudi Arabia

- Built and maintained Power BI dashboards and analytical reports for data owners and stakeholders at the Ministry of Human Resources and Social Development, including Occupation Correction and Hajj and Umrah season reporting.
- Handled data and report requests from intake to delivery, used SQL to extract and validate data, and monitored scheduled refreshes so dashboards stayed accurate.
- Diagnosed data issues by tracing root causes across source systems, data transfer, and the data warehouse, then followed remediation and validated figures after each fix.

Data Entry Specialist

Apr 2024 - Dec 2024

University of South Florida | Tampa, FL, United States

- Prepared complete datasets for use and managed data requests so records stayed organized and easy to find.
